

Module 2 Assignment 1

Ellen Bledsoe

2022-10-11

```
## sample_unit abund_dark_stones
## 1          8          15
## 2          2           7
## 3         60          13
## 4         44          14
## 5         49           8
## 6         22          12
## 7         31           6
## 8          9           9
```

Remember, these numbers will not match your data! They match the values in the `example_data.csv`. I've provided them in case you want to check your code with the example data to make sure you have done the correct thing.

8.

```
## [1] 10.5
```

9.

```
## [1] 11.71429
```

```
## [1] 3.422614
```

10.

```
## [1] 0.875
```

12.

```
## [1] 1.28125
```

13.

```
## [1] 1.131923
```

14.

```
## [1] 672
```

15.

```
## [1] 5248
```

16.

```
## [1] 72.44308
```
